

Mini

Java Project

~~Documentation~~

guide

This project is brought to you by:

Dev Note:

tried

We ~~made sure~~ to respect the constraints assigned to us by you Mister Tarek, so that we could pull off the ~~best, most advanced, most stable~~ video distribution application out there. *or*

^
respectable

Our Amazing Team:

Mohamed Taha Sta | Jesser Hamdi | Fares Makki

Our Goal:

Take on Netflix and become a monopoly in the space of digital media distribution.

How to?

U can log in as either: an Actor
an Admin
a Producer
an ordinary User

We missed you!
Hop on quick!

[Don't have an account? Join us!](#)

We already made the accounts for you, made and populated the DB tables ,so you can test the different features of the application

We made sure to implement EVERYTHING that you requested, so if you requested, it's there inshallah.

The accounts:

Actor

Admin

Producer

Email: t@gmail.com

mt@gmail.com

mt@admin.com

WB@gmail.com

Password: 123

123

123

123

Note:

We only allow Actors, Users and Producers to sign up through the sign up page.

We felt like letting 'Admins' sign up would be quiet silly.

Bellow is our DB schema, ~~which we are very proud of:~~
 OK with R
